

Ubuntu 24.04 通过命令关闭自动休眠，自动挂起

朱梦

初稿于 2025-09-25，修改于 2025-09-25

(1) 关闭自动挂起 (Suspend):

```
| sudo systemctl mask sleep.target suspend.target hibernate.target hybrid-sleep.target
```

(2) 关闭自动休眠 (Hibernate):

```
| sudo systemctl mask hibernate.target
```

(3) 验证是否已关闭:

```
| systemctl status sleep.target suspend.target hibernate.target hybrid-sleep.target
```

如果状态显示为 **masked**，则表示已成功关闭。
